FOR IMMEDIATE RELEASE

AMP Announces Director of Governmental Affairs

(November 9, 2006)—Wade Delk, former Executive Director of the National Organization for Competency Assurance (NOCA) and the National Commission for Certifying Agencies (NCCA), joined Applied Measurement Professionals, Inc. (AMP) as Director of Governmental Affairs and Manager of AMP's new Washington, DC regional office.

"We are excited to offer Mr. Delk's specialized experience in professional certification, program accreditation and government affairs to our clients," said Gary Smith, President and CEO of AMP. "His unique expertise and knowledge in these areas provides another important avenue for our clients in the certification arena and associations overall to expand and promote their programs."

Delk served as Executive Director of NOCA and NCCA from 2000 – 2006. During that time, he directed all operational activities of both the membership association and accrediting body. He also helped to firmly establish the legislative affairs program that resulted in the passage of Federal bills, Federal and State regulations, and enhanced the visibility of the certification and licensure industries, and the association.

"I am excited to work with a cutting-edge testing and management company with a unique commitment to the credentialing industry," Delk said. "This is an important expansion for AMP, and it creates a louder and much needed voice in State and Federal government."

Prior to joining NOCA and NCCA, Delk worked with the National Electrical Manufacturers Association, American Trucking Associations, was a political appointee to the U.S. Department of Commerce, and was the Special Assistant to the Chairman of a national political party.

Delk will be responsible for providing advocacy counseling and program development for organizations or agencies in the certification, licensure, and association industries. He will also serve as Manager of AMP's Washington, DC regional office and work with the Executive Management Team to build the new office.
